Core article angle

There’s no single “best” April destination. Galápagos hits peak manta season, Cocos Island’s hammerhead numbers build to their annual high, Belize gets a second whale-shark full-moon window, Sipadan’s barracuda & jackfish “tornadoes” peak, Grand Cayman has the calmest seas of the year, and Fakarava’s grey reef shark walls keep building toward their June–July peak. Each destination pick is framed around “why April, specifically,” rather than a generic destination write-up.
